About Project:

This Project is based on C++

In this Program

First we will ask player to enter his details and we greet player and

Then, we will give instructions about the game, which are

a) There will be few questions which are asked to player based on current affairs, general knowledge etc.

b) Player has to think of the answer.

c) If player doesn't know the answer or confused we will provide lifelines which are

fifty - fifty and audience pole.

d) Player can chose each lifeline only once throughout the game.

e) If player is sure of answer and gives a correct option as answer then player goes to next level (In terms of money).

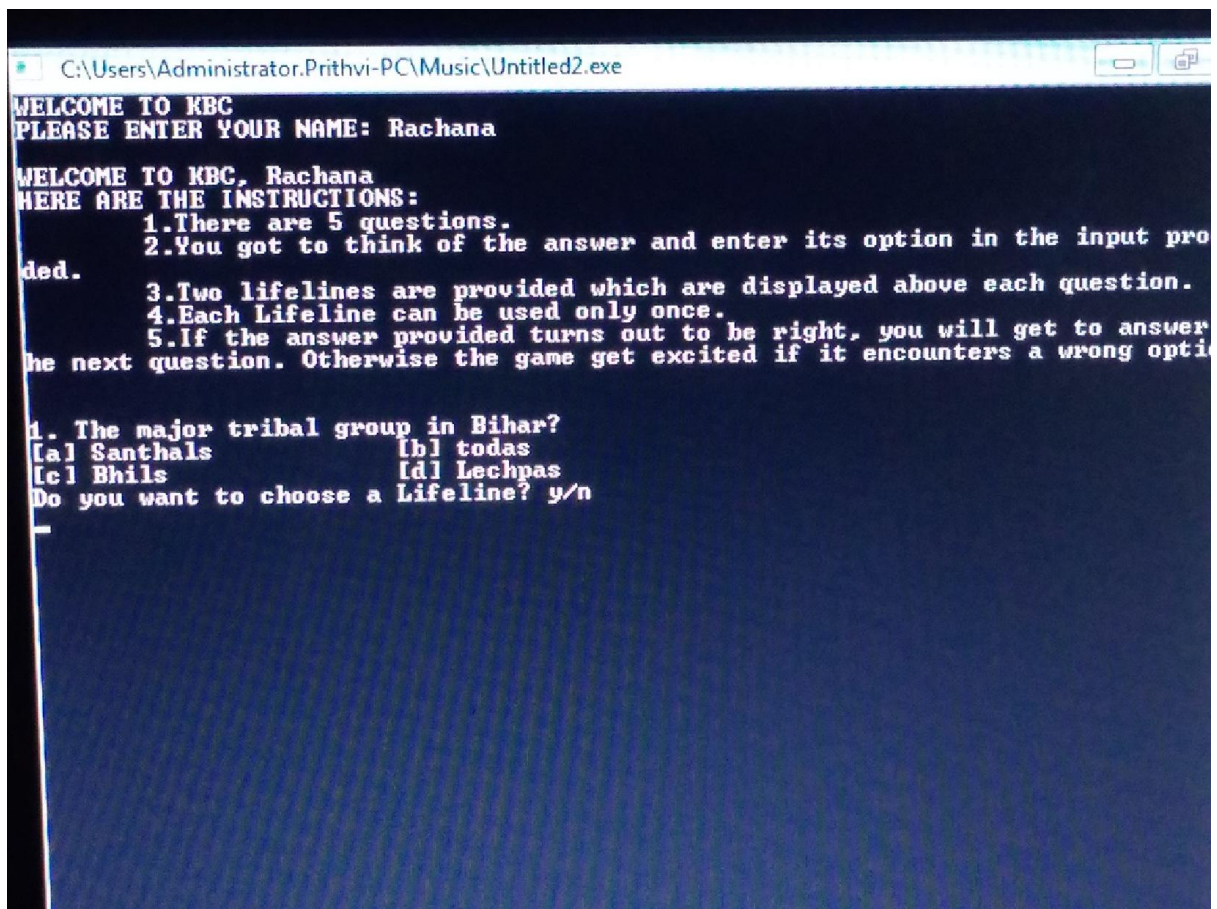

f) If player fails to give correct answer he/she has to come out of the game.

g) Once player has answered all the questions correctly he has to quit the game by pressing 1.

We have used functions, classes in this project.
